Do you want to reassign this back to Beth? I had taken this since it was in the old backlog pile, it was the one that she went rounds with Steve on. I haven't touched it and probably won't get a chance to for a while.

The first revision submitted November 30, 2017 is attached.

We have gone through several glyphosate label reviews since this was submitted, so if you (or Beth) want to simply send me areas of the label that you want me to make changes to that are similar to changes made to other labels, please do, if that will simplify your task. For example, "remove all application rates of tank-mix products throughout the label."

Thanks,

Steve

Can you send me your revision? Either I will work on this or it may go back to Beth.

*Mindy*

Hi Mindy –

Yes ma'am, many of the supplemental uses that we want to incorporate into that amended Master Label have now expired.

I submitted a first revision to that label on November 30<sup>th</sup> of last year, which incorporated Bethany's comments and other changes based on recent learnings from Team 25, such as removal of the word "enhanced" from the label. I haven't received any feedback since then.

I look forward to working with you to finalize this important label. Thanks for helping to move it forward.

Steve

Hi Steve,

Are you still pursuing the 5/15/17 label amendment for 524-544 adding me-too uses? Just want to check before we pick this back up.
